RECENT RELEVANT EXPERIENCE

Pumas-AI, US — *Product Engineer*

OCT 2022 - PRESENT

- Leading the technical development of PumasCP's, agentic AI system capable of executing end to end pharmacometric workflows through report generation. Designed key aspects of the architecture around the UI, Agent Client Protocol and Model Context Protocol, enabling ai agents to operate through controleld tools while protecting client data.

- Spearheaded development of AskPumas, a Rag-based AI assistant for pharmacometricians and researchers. Led UI design and implementation,secure local data handling and a document/link feature for context-aware AI responses.

- Played a key role in PumasCP, a platfrom for NCA and BE project management. Built the TLF workflow and data wrangling system of the application. I was also the defacto team lead during the team lead's absence
- Worked with a variety of technologies inclusive of, React, Node, Julia, AWS Services

Asili Agriculture, Uganda — *Software Engineer (Remote)*

JUL 2021 - NOV 2022

- · Worked across the frontend and backend of a digital agriculture platform for managing smallholder farmers, farm records, and operational workflows, with a strong focus on backend development.
- ·Built backend services supporting seasonal production planning, loan applications, repayment tracking, farm mapping, and crop produce management.
- Contributed to the web admin dashboard where needed, helping translate field and administrative workflows into usable product features.

Juniqe, Germany — *Software Engineer (Remote)*

FEB 2021 - NOV 2021

- Developed lambda functions to support interactive web applications for Juniqe's wall-art section.
- Contributed significantly to adding new features to Juniqe's React-based customer service tool.
- Worked with a variety of technologies inclusive of, React, Node, Commerce Tools, AWS Services

Aimform, Hungary — *Software Engineer (Remote)*

OCT 2019 - JAN 2021

- Analyzed requirements and designed, developed, and implemented software applications for various clientele ranging from simple APIs to data analysis and visualization
- Worked with a variety of languages and technologies such as PHP, T-SQL, JavaScript, TypeScript, React Node Express Mongo, Postgres, Docker, AWS
- Performed software testing to uncover bugs and troubleshoot performance issues prior to application launch.

Andela, Uganda — *Software Engineer*

NOV 2018- SEPT 2019

- Collaborated with developers spanning multiple time zones on all stages of the systems development lifecycle, from requirement gathering to production releases.

- Engineered and maintained major features of Andela's engineer placement process managing app
- Worked with a variety of technologies inclusive of Django, React, Node, Express, Mongo, Postgres

SKILLS

Programming Languages

Python, JavaScript, TypeScript, PHP, T-SQL, Julia

Libraries and Frameworks

React, Redux, Node, Express, Django, Flask, Various Testing Libraries

Tools & Platforms

Git, Travis, CircleCI, Docker, AWS

EDUCATION

Uganda Martyrs University, Nkozi — *BSC Statistics*

AUG 2012 - MAY 2015
